HAYMES HAS A SOLUTION FOR ANY SURFACE

## expressions

### HAYMES PAINT EXPRESSIONS

Our flagship Ultra Premium Interior Expressions range feature industry leading low VOC water-based formulations. Expressions low VOC interiors are available in a number of sheen levels, delivering a washable coating that allows for most stains to be removed without marking. Ideal for wet areas, it comes with an additional 7-year mould and mildew protection guarantee.

## EXTERIOR OR solashield

### HAYMES PAINT SOLASHIELD

Haymes Ultra Premium Solashield exterior product range features the latest technology in decorative paint and finishes for harsh Aussie climates. Featuring our exclusive Surface Lock Technology™ Solashield delivers a 20 Year Guarantee on properly prepared surfaces. Self-priming, salt resistant and repelling dirt and mould – it's the perfect UV defence!

## ELITE PROFESSIONAL

### HAYMES PAINT ELITE

Our Elite trade range is specifically designed and developed for our network of professional applicators. It features different formulas and skus that provide greater time efficiency for our trade painters on site. Specific product attributes like fast drying, filling capability, minimised roller splatter and multi-purpose preparation products (such as a 3-in-1) are a key part of our Elite range of interior and exterior products.

## Haymes RENDERTEX TEXTURE COATINGS

### HAYMES RENDERTEX

Haymes Rendertex is a professional range of roll-on and trowel-on render and textural coatings designed to work as part of an integrated system. A specialist range of finishes using quartz, marble and sand to generate a number of diverse and decorative effects based on application technique and can also be tinted to a wide range of colours.

## Haymes CONCRETE & PAVING PROTECTION

### HAYMES CONCRETE & PAVING PROTECTION

Whether it is a path, driveway, workshop floor, or an entertaining area, the Haymes Concrete & Paving Protection range has the solution. Ideal for rejuvenating previously coated or aged concrete and for protecting new concrete surfaces, the coatings repel dirt while being a cost-efficient method to enhance the style and value of the home.

## Haymes WOODCARE

### HAYMES WOODCARE

Haymes Woodcare is a range of products developed to bring out the natural beauty of a timber surfaces across both interior and exterior environments. From cutting-edge water-based technology, traditional oil, stains, putties, cleaners through to anti-slip additives - our Haymes Woodcare delivers an industry leading suite of products dedicated to timber surfaces.

### HAYMES ARTISAN COLLECTION

HAYMES HAS A SOLUTION FOR ANY SURFACE

## INDUSTRIAL COATING SOLUTIONS

## PEEL AWAY

PAINTREMOVALSYSTEM

### HAYMES INDUSTRIAL COATING SOLUTIONS

Haymes Industrial Coating Solutions are a range of seven key products that generate over nineteen finishes. Our colour of choice delivers mandatory Australian Standards as well as a palette of over twelve thousand colours. With multi-binder and direct to metal coatings the range can be applied to numerous substrates. Industrial Coating Solutions suit a range of commercial, machinery, agricultural, construction as well as protective and vinyl industry.

### PEEL AWAY

Peel Away is a revolutionary concept in paint removal. Available in a range of products, the solution can remove up to thirty layers in one application. Peel Away is a recommended system by the EPA for removing oil and lead-based paint and containing them on site especially with older heritage or historical building.

## ROOFCOTE

## TREDGRIP

ROUBERISED NON-SLIP COATING

### ROOFCOTE

Roofcote coatings are designed specifically to cope with Australian conditions. From chilling salt spray on the coast to hot and dusty deserts, Roofcote can handle it all! As well as being durable, Roofcote has the in-built flexibility to cope with rapidly changing roof surface temperatures throughout the day. The Roofcote range also features heat reflective options that optimise the thermal performance of your home.

### TREDGRIP

Tredgrip is a rubberised non-slip coating that's suitable for a multitude of applications. A styrene acrylic copolymer with high elasticity and tensile strength it includes cross-linked crumbed rubber to act as a non-skid medium. For around pools, school playgrounds or sports courts, Tredgrip can be applied over a variety of surfaces including concrete, timber, steel, aluminium or fibreglass.

# The Haymes Brand Has True Australian Character.

Born in Ballarat in 1935, our family run business is now in the hands of the fourth generation of Haymes'. Over the years, each member has taken care to hand on the commitment and passion for crafting quality products. After all, it is our name and reputation on the can.

After 86 years we are proud to be the largest remaining Australian made and Australian owned paint brand.

## DISCLAIMER

We provide Haymes Colour Consultations to assist our customers in realising their vision by assisting with colour choices. The consultation is about colour and aesthetic, rather than advice about the technical appropriateness of particular products.

- We provide suggestions for how you can achieve your vision, we don't dictate how you must do it. You need to decide for yourself whether our suggestion is right for you.
  - Our consultation is not about recommending a particular product and whether it meets your technical requirements. It is about colour choices only
- You are responsible for alerting your consultant to any colour restrictions, either due to heritage restrictions, estate rules or technical requirements of particular building products. Merely telling your consultant the address or name of the building product will not alert your consultant to any applicable restrictions.

## COLOUR

While we make every effort to make a colour suggestion that captures your vision:

- Colours are a matter of individual taste;
- The way that colour looks depends on the surface to which the paint is applied: its material, whether it is flat or uneven, smooth or rough, how light falls onto it, surrounding colours and the size of the area being painted.

You should use sample pots to test the chosen colours before painting the whole surface.

## SHEEN

Consider the most appropriate level of sheen. Higher gloss is harder wearing and easier to clean, but shows up any unevenness in surfaces. Some surfaces look great in gloss, others better in low sheen.

## HERITAGE OR ESTATE COLOUR SCHEMES

We will not know what heritage or estate colour schemes may apply to your home unless you clearly tell us what those schemes are. Telling your consultant your address is not enough. You are ultimately responsible for ensuring that the colours you choose comply with any such restrictions.

## SPECIALIST APPLICATIONS

Some surfaces, such as engineered building products, may have special requirements as to colour or sheen. You need to tell your consultant what those requirements are. Merely telling your consultant that you are painting a particular building product will not alert our consultant to those requirements.

## PRODUCT

This consultation is about colours rather than products. You need to ensure that the product you purchase and apply is suited to the surface in question. Check the product label, the Haymes Paint Product Data Sheet (available at [haymespaint.com.au/products/product-information/](http://haymespaint.com.au/products/product-information/)) or call Haymes Service Express on 180 0 33 431 for expert advice on choosing the right product.

## APPLICATION

When applying our products, you must prepare the surface and apply the product according to the product label and AS/NZS 2311:2017. Failure to comply with these directions is likely to affect durability and finish.

Colours and products are recommendations only. For any discrepancies or uncertainties please contact your colour consultant for clarification as soon as possible. Colours shown are as close to actual paint colours as printing process allows. We recommend a test area be applied prior to final colour choice, as lighting conditions can affect the appearance of colours. Any recommendations independent to Haymes Paint (including painters, suppliers, products, etc) are referrals only. Haymes Paint does not take responsibility for independent works, products and warranties.
